

XA ASCENDANT

XA ASCENDANT

Dominant. Superior. Rising in power.

**This reflects the strength and the
cutting edge styling of the
Xplore_Aus Ascendant tray.**

THE ASCENDANT

The Ascendant tray is Australian made and manufactured with a uniquely designed single length laser cut frame and interlocking joins and a stylish 5 fold convex rear end. This unique design, fully welded and powder coated creates a lightweight yet strong finish.

The Ascendant tray has removable lightweight sides, LED tail lights with sequential indicators and easy to access stainless hardware throughout. Made with integrated spare wheel mounts and adjustable wheel arches to suit any wheel and a modular design which allows for trouble-free repairs and maintenance. The Ascendant tray has provisions for water and air incorporated into the design and has integrated mounts to suit an Xplore_Aus half or full canopy, shaped to follow the lines and style of the tray.
