

XA ALLEGIANT

XA ALLEGIANT

**loyal, staunch,
faithful and steadfast.**

**This reflects the strength and the
cutting edge styling of the
Xplore_Aus Allegiant tray.**

THE ALLEGIANT DIFFERENCE

The Allegiant tray is Australian made and manufactured with a uniquely designed single length laser cut frame and interlocking joints. This unique design, fully welded and powder coated creates a lightweight yet strong finish.

The Allegiant tray has removable lightweight sides, various tail light options with plug and play harnesses and easy to access stainless hardware throughout. Made with adjustable wheel arches to suit any wheel and a modular design which allows for trouble-free repairs and maintenance.

The Allegiant tray has provisions for water and air incorporated into the design and has integrated mounts to suit an Xplore_Aus half or full canopy, shaped to follow the lines and style of the tray.
